DAISY CENTRE AND SCHOOL,
C.R.E ASSIGNMENT 6 FOR CLASS 7 JUNE 2020.

Care for the aged.

- Aged people are those people who are elderly.
- Elderly people may lack food, clothing, shelter and medical care.
 - The church has built homes for elderly.
 - Such homes are Mji wa Wazee and Little Sisters for the poor run by the Catholic church.
 - Churches care for the aged through sermons and church seminars.
 - The church encourages donations to the aged.
 - Christians organizations like World Vision International and Missionaries abroad donations to the aged in Kenya.
 - The church follows the teaching of Jesus of helping the needy.
 - Jesus taught His disciples to feed, clothes, visit the prisoners and welcome the needy.
 - There is a reward for those who help the needy.
 - By helping the needy we are obeying Jesus' command.

Care for the orphans.

- An orphan is a child whose one or both parents are dead.
- An orphan may face many problems such as lack of education, food, shelter, love from parents, relatives and guardians.
- Some orphans end up in streets.
- The church has decided to build orphanages.
- The church offers basic needs, medical care and educations to the orphans.
- The bible teaches that God considers the taking care of the orphans to be a genuine Christian.
- When taking care of the orphans, we show our sincerity as Christians.

- It is good to support the church by giving whatever is needed to the orphans.
- God is always happy when we support the orphans and the orphanages.

QUESTIONS

1. Write at least three problems faced by the aged people.

- 2 . What do the churches do in order to help the aged?
3. Who is an orphan?
- 4 .Outline problems facing orphans.
5. What does the bible teach us about caring for the orphans?

DAISY CENTRE AND SCHOOL,

DAISY CENTRE AND SCHOOL,

CLASS 7 MATHEMATICS JUNE ASSIGNMENT 2020

DECIMALS

Recurring decimals

- These are decimals that repeat themselves
- They are formed with non-terminating fractions.

Example 1

Rewrite $2/9$ as a decimal.

$$2/9 = 0.22222.....$$

0.2222..... is called a recurring decimal.

It can be written in short using a decimal notation as $0.\overset{\cdot}{2}$

Example 2

Convert $1/6$ into a decimal

$$1/6 = 0.16666.....$$

Digit 6 is recurring

The decimal can be written in short as:

$$1/6 = 0.1\overset{\cdot}{6}$$

Exercise

Convert the following fractions into decimals and write your answer correct to 3 decimal places. Using a decimal notation.

a) $2/3$

b) $4/9$

c) $1/11$

d) $\frac{1}{3}$

e) $7\frac{11}{30}$

f) $\frac{7}{15}$

g) $\frac{1}{12}$

h) $\frac{8}{9}$

NB: The exercise MUST be written in your mathematics classwork books.
